OBJECTIVE

Second-year Computer Science & Engineering student focused on full-stack and AI-powered software development. Builds production-style projects end to end -- database schema, backend routes, and front-end design -- to learn technologies by shipping with them, not just studying them. Looking for internship and open-source opportunities in software engineering or applied AI.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science & Engineering

UIET, Panjab University, Chandigarh -- Second Year (2024 - Present)

Relevant coursework: Data Structures & Algorithms, Differential Equations, Database Systems, Object-Oriented Programming, Computer Networks.

PROJECTS

WanderLust -- Full-stack property listing platform

Node.js, Express, MongoDB, Mongoose, EJS

- Built an Airbnb-style listings platform with a full MVC architecture on Express and MongoDB.
- Designed and implemented a complete front-end design system from scratch, including a defined visual identity, CSS, and EJS templates.
- Debugged database name mismatches and schema validation issues across environments.
- Scoped a roadmap for authentication, reviews, wishlists, Cloudinary, and Mapbox integration.

FixIQ -- Browser-based AI product diagnostic tool

Vanilla JavaScript, HTML, CSS, Anthropic API

- Built a client-only diagnostic web app that calls the Anthropic API directly from the browser.
- Implemented a secure API-key entry modal so users supply their own key rather than shipping one in source.
- Solved ES module serving and API authentication header issues without any backend or build tooling.

UIET Attendance Tracker -- College project

HTML, CSS, JavaScript

- Built an admin panel with subject-wise navigation wired into the college's existing login and attendance pages.

SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend: HTML5, CSS3, Tailwind CSS, React, Next.js, EJS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL, Mongoose, Prisma ORM

AI & ML: Anthropic API, Prompt Engineering, LangChain (learning), RAG (learning)

Tools: Git, GitHub, VS Code, Spyder, Postman

ACHIEVEMENTS & CERTIFICATIONS

Add hackathons, competitions, and certifications here as they happen.
